# Safety Information

## Important Information

Read these instructions carefully and look at the equipment to become familiar with the device before trying to install, operate, service, or maintain it. The following special messages may appear throughout this manual or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of either symbol to a “Danger” or “Warning” safety label indicates that an electrical hazard exists which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that accompany this symbol to avoid possible injury or death.

### **DANGER**

**DANGER** indicates a hazardous situation which, if not avoided, **will result in** death or serious injury.

**Failure to follow these instructions will result in death or serious injury.**

### **WARNING**

**WARNING** indicates a hazardous situation which, if not avoided, **could result in** death or serious injury.

### **CAUTION**

**CAUTION** indicates a hazardous situation which, if not avoided, **could result in** minor or moderate injury.

### **NOTICE**

NOTICE is used to address practices not related to physical injury.

## Wiser Micromodule for Fil Pilote radiators

THG\_CCTFR6710

### For your safety

#### **⚠️⚠️ DANGER**

##### **HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH**

Safe electrical installation must be carried out only by skilled professionals. Skilled professionals must prove profound knowledge in the following areas:

- Connecting to installation networks.
- Connecting several electrical devices.
- Laying electric cables.
- Safety standards, local wiring rules and regulations.

**Failure to follow these instructions will result in death or serious injury.**

#### **⚠️ DANGER**

##### **HAZARD OF ELECTRIC SHOCK**

- Make sure that the terminal connection area does not come in contact with the metallic parts of any device installed in the same location.
- Do not short the outputs to neutral.

**Failure to follow these instructions will result in death or serious injury.**

## About the device

The Wiser Micromodule for Fil Pilote radiators (hereinafter referred to as **module**) is intended for controlling FIP compatible electric heaters. In combination with the Wiser app and a Wiser compatible Thermostat, the room temperature can be regulated. Energy consumption can be measured and, if necessary, the load can be shed.

The room will have a (temp sensor) room thermostat. The user sets the room setpoint and the hub compares the temperature of the room. If its too low, the hub sends the command to the module to heat. Once the room is set to correct temperature, the hub sends the command to stop heating.

### NOTE:

- Up to 4 modules can be added to one room.
- The electric heater must be set to automatic mode, as Wiser can only control the room temperature in automatic mode. We also recommend setting a higher set point temperature than usual, e.g. 25 °C.

## Installing the device

Refer to the installation instruction supplied with this product.

## Pairing the device

Using the Wiser Home app, pair your module with the **Wiser Hub** to access and control the electric heater.

To pair the device:

1. On the **Home** page, tap .
2. Tap **Devices** >  > **Climate** > **FIP Micromodule** > **Next**.

**NOTE:** The next screen shows the joining process of device.

3. Short press the Setup/Reset button of the module 3 times.

The LED first blinks amber.

4. Wait for a few seconds until the LED turns green.

The device is joined.

5. On the device setup page, tap  (A) and enter a name for the device.

**IMPORTANT:**

- The maximum power consumed by the appliance controlled by the module is known as **Nominal power**. It is the maximum power the module can manage.
- By default, the value is 2000 W. The nominal power must be between **1 and 4600 W**.

**NOTE:** The Nominal power value will only be used for the future updates in the Wiser Home app.

6. If you like to modify this value, proceed with step 7 else proceed with step 9.

7. Tap  (B).

8. Tap **OK** and enter a value between 1 to 4600 W based on the load connected.
9. Tap **Next** and assign the device to a new room or an existing room.
10. Tap **Submit**.

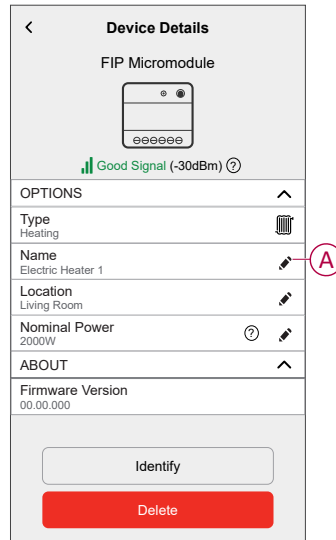

Once the pairing process is complete, the device name (example, Heating) is listed under **All** devices in **Home** page.

## Configuring the device

### Renaming the device

Using the Wiser Home app, you can rename your device.

1. On the Home page, tap .
2. Tap **Devices > Climate > FIP Micromodule > Name (A)** to rename the device.

The settings will be saved automatically.

**NOTE:** The **Type** is available as **Heating** by default. You cannot edit it.

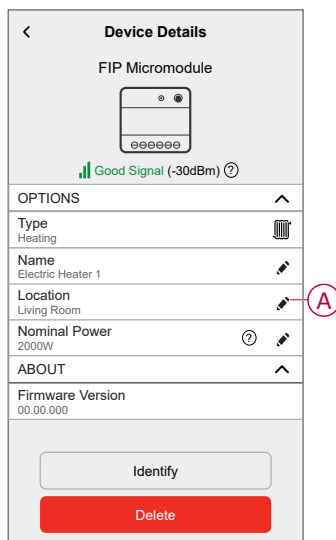

### Selecting the device location

Using the Wiser Home app, add the device to any room (such as living room, bedroom, etc).

1. On the Home page, tap .

2. Tap **Devices > Climate > FIP Micromodule > Location (A)** to assign the device to an existing room or a new room and tap **Submit**.

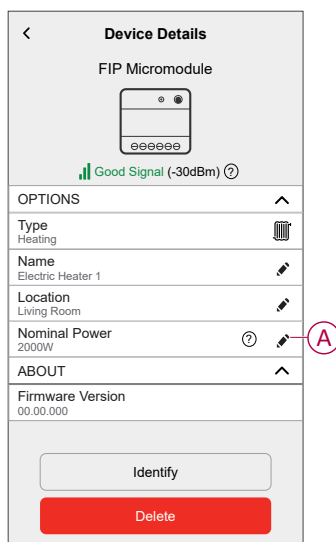

**NOTE:** Tap **Remove from Room** to remove the device from the existing room.

## Changing Nominal Power

Nominal Power is the maximum power this device can manage. By default, the value is 2000 W. Using the Wiser Home app you can change the value if required. To change the Nominal Power value:

1. On the Home page, tap .
2. Tap **Devices > Climate > FIP Micromodule > Nominal Power (A)**.

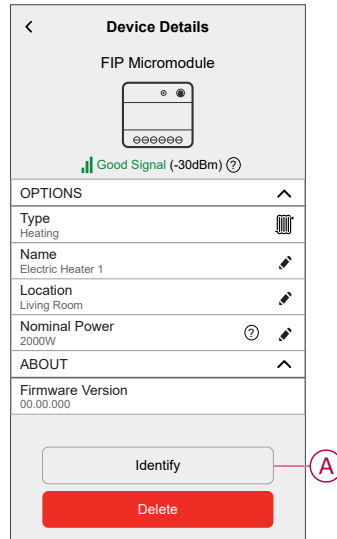

3. Tap **OK** and enter a value between 1 to 4600 W based on the load connected. The settings will be saved automatically.

**NOTE:** The Nominal power value will only be used for the future updates in the Wiser Home app.

## Identifying the device

Using the Wiser Home app, identify the module among the devices available in a home.

1. On the Home page, tap .
2. Tap **Devices > Climate > FIP Micromodule > Identify (A)**.

The status LED blinks green, upon successful identification of the module.

3. Tap **OK** to finish identifying the device.

## Setting Tariff

You can set tariff in the Wiser Home app to access your energy cost and billing data.

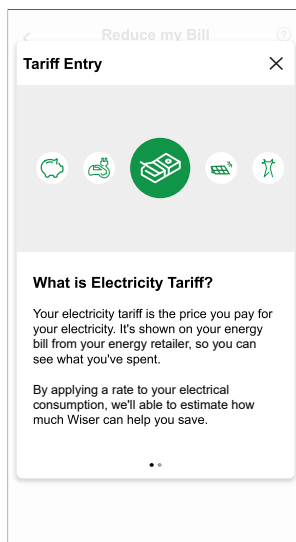

You can set the tariff based on your contract type:

- **Flat rate:** Flat rate is defined as the fixed rate for the entire time period of electricity service. [Configuring - flat rate, page 12.](#)
- **Peak/Off-Peak Hours rate:** Peak rate is defined as a rate set to a specific period of time at which electrical consumption is at its highest. Off peak rate is the time period when the demand for power is at its lowest. It is the amount you pay for each unit of electricity consumed for the time period set. Refer to [Configuring - peak rate, page 13.](#)
- **No contract:** Electricity rate is not set, no information related to bill will be shown in the app.

**NOTE:** By default, **No Contract** option is set.

Once the device is commissioned, user gets notified that this feature is available. The **Tariff Entry** screen appears on the Home page.

1. Tap **Continue**.
2. Read the feature update and swipe to navigate to next screen.
3. Tap **X** to close the overlay screen.

**NOTE:** If you have not configured your tariff, a push notification will be sent after 2 weeks and the last reminder after 6 weeks.

## Configuring - flat rate

To set flat rate:

1. After reading the Tariff onboarding information. On the **Tariff** screen, tap **Electricity**.

**NOTE:** If you have already configured your tariff settings, follow below menu navigation if you need to modify tariff rate

On the **Home** page, tap  > **Tariff** > **Electricity**.

2. Tap  (A) and select **Flat**.

3. Tap  (B) to set the contract limit.

a. Tap the toggle switch to set the Contract limit in kVA.

b. Select a value and tap **Set**.

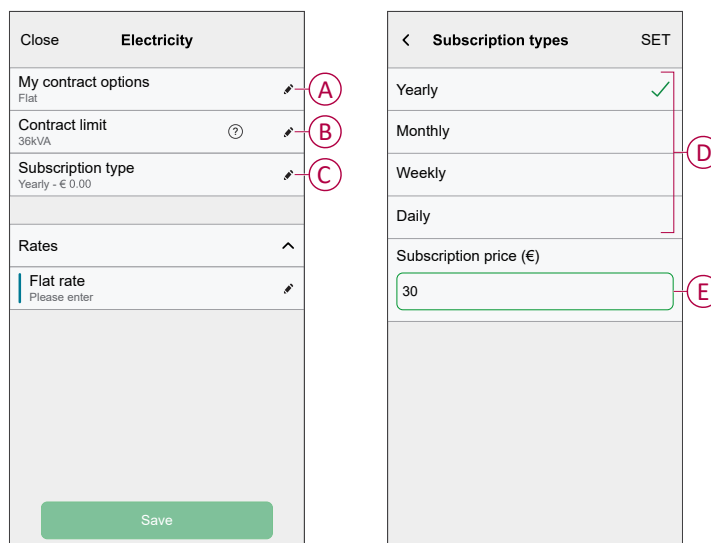

A notification window will be prompted that the Contract Limit is used by Anti-Tripping Management algorithm. If set incorrectly it may not work as expected and could result in the power tripping.

**IMPORTANT:** Anti-Tripping is applicable only if you have installed Water Heater or EV Socket in your home.

c. Tap **Continue**, if you like to proceed.

4. Tap  (C) and select a subscription type (D) (refers to recurrent fee).

5. Enter a subscription value in the **Subscription price (€)** (E) field and tap **SET**.

The image shows two screenshots of the app interface. The left screenshot is titled 'Electricity' and shows a list of options: 'My contract options' (with a pencil icon labeled A), 'Contract limit' (with a question mark icon labeled B), 'Subscription type' (with a pencil icon labeled C), and 'Rates' (with an upward arrow icon). Below 'Rates' is a 'Flat rate' section with a 'Please enter' prompt. At the bottom is a green 'Save' button. The right screenshot is titled 'Subscription types' and shows a list of options: 'Yearly' (with a green checkmark), 'Monthly', 'Weekly', and 'Daily'. A bracket labeled D groups these options. Below the list is a 'Subscription price (€)' field with the value '30' entered, labeled E. At the top right is a 'SET' button.

6. Tap  (F), enter a flat rate of consumption in the **Rate - €/kWh** field and tap **Save**.

7. Tap **Save(G)**.

## Configuring - (peak/off-peak) rate

To set peak rate:

1. After reading the Tariff onboarding information. On the **Tariff** screen, tap **Electricity**.

**NOTE:**

- If you have already configured your tariff settings, follow this menu navigation to if you need to make changes:
- On the **Home** page, tap > **Tariff** > **Electricity**.

2. Tap (A) and select **Time of use (peak /off-peak hours)**.
3. Tap (B) to set the contract limit.
  - a. Tap the toggle switch to set the Contract limit in kVA.
  - b. Select a value and tap **Set**.  
A notification window will be prompted that the Contract Limit is used by Anti-Tripping Management algorithm. If set incorrectly it may not work as expected and could result in the power tripping.  
**IMPORTANT:** Anti-Tripping is applicable only if you have installed Water Heater or EV Socket in your home.
  - c. Tap **Continue**, if you like to proceed.
4. Tap (C) and select a Fixed charge type (refers to recurrent fee) -**Yearly, Monthly, Weekly, Daily**.
5. Enter a fixed charge value in the **Cost (€)** field and tap **Set**.  
**NOTE:** The **Fixed Charge** is applied to recover the basic cost of electric service, independent of how much energy is used. These charges are electricity costs that don't change no matter how much electricity you use. This amount is fixed in your electricity bills.
6. Tap (D), enter peak rate of consumption in the **Rate - €/kWh** (F) field and tap **Add** (G).
7. Tap **Add a rate**.
8. Enter the name of the rate in the text field (E).

9. Enter a target value in the **Rate - €/kWh** field (F) and tap **Add** (G).

The left screenshot shows the 'Electricity' settings screen. It has a 'Close' button at the top left. Below it are sections for 'My contract options' (Time of use (peak/off-peak hours)), 'Contract limit' (45A), 'Fixed charges' (Annual - £30), 'Rates' (with an expand/collapse arrow), 'Peak rate' (Rate 0.1535 €/kWh), 'Add a rate' button, 'Schedules' (with an expand/collapse arrow), 'Add a schedule' button, and a 'Save' button at the bottom.

The right screenshot shows the 'Add a rate' screen. It has a '< Back' button at the top left and an 'Add a rate' title. Below the title is a 'Standard' rate type dropdown (E), a 'Rate - €/kWh' input field with the value 0.1135 (F), and an 'Add' button at the bottom (G).

**NOTE:** Maximum 5 additional rates can be added.

10. Tap **Add a Schedule** (H) to set the time frame.

The screenshot shows the 'Electricity' settings screen. It has a 'Close' button at the top left. Below it are sections for 'My contract options' (Time of use (peak/off-peak hours)), 'Contract limit' (45A), 'Fixed charges' (Annual - £30), 'Rates' (with an expand/collapse arrow), 'Peak rate' (Rate 0.1535 €/kWh), 'Standard rate' (Rate 0.1135 €/kWh), 'Overnight rate' (Rate 0.1115 €/kWh), 'Add a rate' button, 'Schedules' (with an expand/collapse arrow), 'Add a schedule' button (H), and a 'Save' button at the bottom.

11. Enter a schedule name in the **NAME** field. Example, Weekend tariff.
12. Select the days of the week in **DAYS** field to apply the schedule.
13. Tap  to set **Start time** and **Finish time**.
14. Tap the icon to activate **Green energy** if your energy provider delivers green energy in that timeframe.
15. Tap  and select a **RATE TYPE**.

**IMPORTANT:** It is necessary to set off-peak hours for each day per schedule (I) else you will not be able to save your tariff details.

16. Tap **Add** and then tap **Save**.

The left screenshot shows the 'Add Schedule' screen. It has a back arrow and the title 'Add Schedule'. Below the title is a 'NAME' field with the text 'Weekday charge'. Underneath is a 'DAYS' section with seven circular buttons for the days of the week: M, T, W, T, F, S, S. Below that is a 'TIME' section with 'Start time' (08:00) and 'Finish time' (16:00). There is a 'Green energy' toggle switch which is turned on. Below that is a 'RATE TYPE' section with 'Standard Rate' selected. At the bottom is a green 'Add' button.

The right screenshot shows the 'Electricity' screen. It has a 'Close' button and the title 'Electricity'. Below the title are sections for 'My contract options', 'Contract limit', 'Fixed charges', 'Rates', and 'Schedules'. The 'Schedules' section is expanded, showing a list of schedules. A red circle with an exclamation mark highlights a warning message: 'You need have schedule included off peak hrs for each day'. Below the warning is a schedule entry for 'Weekday charge' with a green star icon and the time '08:00-16:00'. At the bottom is a green 'Save' button.

**TIP:** You can create multiple schedules by tapping **Add a schedule**.

**NOTE:** Avoid assigning the same date and time to more than one schedule to avoid conflicts.

## Using the device

### Operating modes

Using the Wiser Home app, you can control the Heating devices.

1. On the **Home** page, tap **All devices > Heating device**.
2. On the control panel page, the current temperature is shown.

3. Drag the sliding bar up/down (A) to adjust the set-point temperature (Heating).

The current operating mode indicates the mode in which the system is working.

- **Off** : Turns the system off, available in **Home** page.
- **Heating** : System operates in heating mode when the set-point temp > room temp.
- **Boost mode** : Boost Mode will apply a boost of +2 °C for one hour to every room in the system. For more information on different modes, refer to [Wiser Modes](#).
- **Room settings**: You can edit the room name for the device.

**NOTE:** To access live, history and energy insights, it's recommended to install PowerTag on the module loads. Refer to [Checking device consumption](#).

## Setting alarms

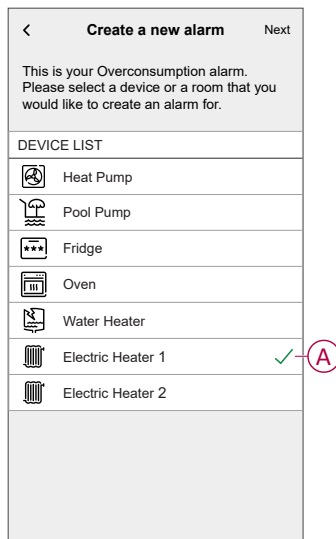

Using Wiser Home app, you can set alarms to notify overconsumption or no consumption of loads.

**NOTE:** Each device can have one overconsumption and one no consumption alarm.

To configure alarms:

1. On the Home page, tap .
2. Tap **Account > Notifications and Alarms > Create a new alarm**.
3. Select an alarm type
  - Overconsumption
  - No consumption

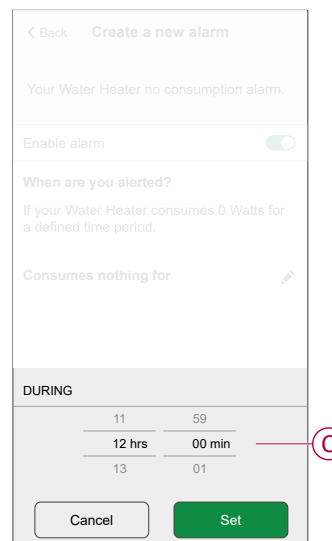

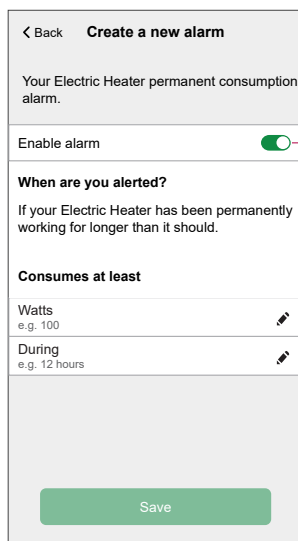

4. Select a device from the list (A) and tap **Next**.

5. Enable the toggle switch (B) to set the alarm.

6. Tap  (**Watts**) and enter a value to set a power limit.

7. Tap  (**During**), select a time limit (C) and tap **Set**.

8. Tap **Save**.

## Creating a schedule

The Heater can be controlled and triggered by a schedule. Once the schedule is set, your system will follow the active schedule. You can create or modify the schedules at any time.

To create a schedule:

1. On the **Home** page, tap  > **Schedules** > .
2. Enter a name of the schedule (A).
3. Select a device type (B).
4. Select the list of devices (C) to which the schedule must apply.

5. Tap **Create**.

A notification window is shown - **The Wiser Home app creates an automatic schedule for your home. You can either keep or change it to suit your routine.**

6. Tap **See my schedule**.

If you wish to create a new schedule, follow these steps:

- Tap to add an event.
- Select a temperature (D), time period (E) and tap **Set**.

**TIP:**

- If you want to edit the existing event, tap and make the changes.
- You can add multiple schedules based on your requirement. Select days, tap , set on/off state and time.
- You can copy the existing schedule to another schedule or to the days of your choice. Tap .
  - Tap **Schedule** and select an existing schedule and tap **Copy**.
  - Tap **Day** and select the days you want to assign and tap **Copy**.

## Automation

An automation allows you to trigger an action automatically or at scheduled times. By using the Wiser Home app, you can create automations based on your needs. This example demonstrates how a device works when the condition is met.

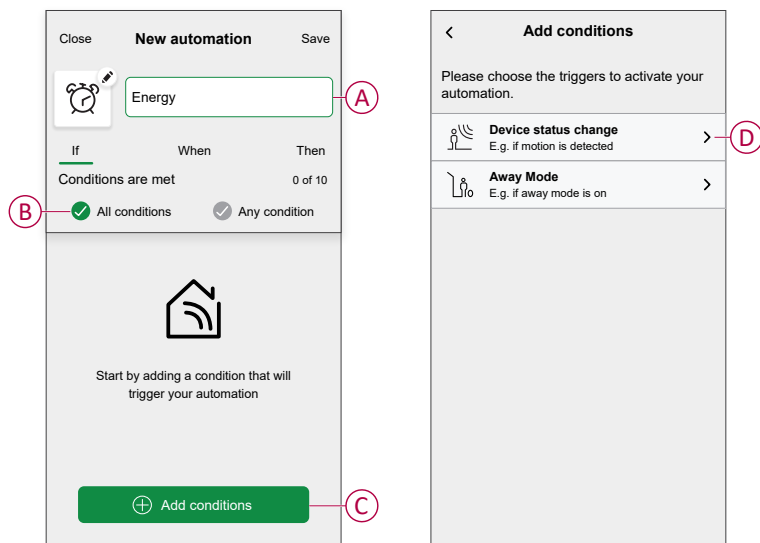

### Creating an automation

The following is an example of creating an automation to boost for few hours when the heater is set to certain temperature.

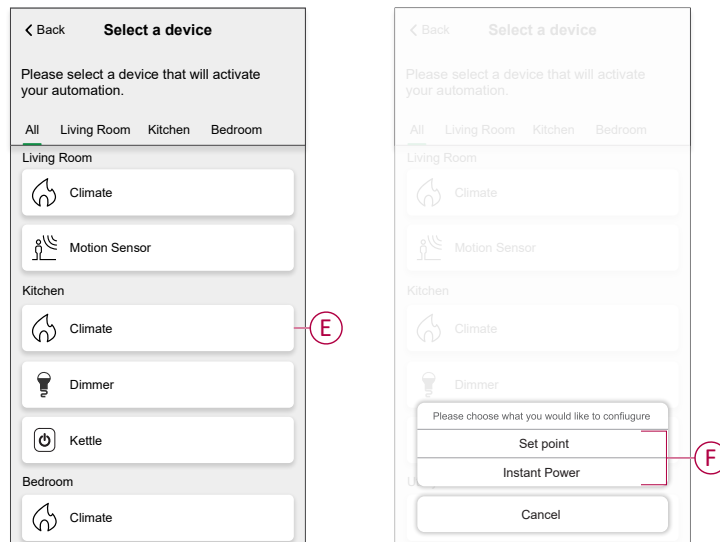

To create an automation:

1. On the **Home** page, tap  > **Automation** > .
2. Tap  and choose an icon that best represents your automation.
3. Enter a name of the automation (A) and select any of the following conditions to meet (B).
  - **All conditions:** All conditions must be met to trigger an automation
  - **Any condition:** Any one of the condition must be met to trigger an automation.
4. Tap **Add conditions** (C) and select any of the following (D):
  - **Device status change** (Select the device)
  - **Away Mode** (Enable or Disable)

**NOTE:** Maximum 10 conditions can be added.

5. Select a device (E) that will set the condition and then select **Set point** (F).

6. Select **less than** (G) and drag the sliding bar (H) up/down to set the temperature.

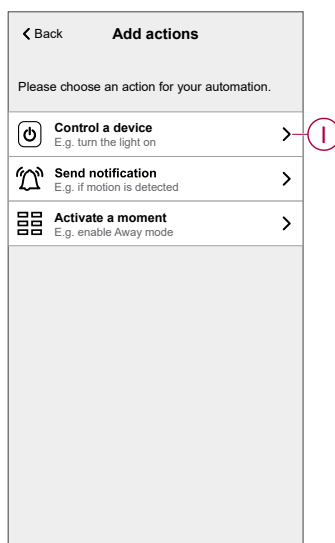

**NOTE:** To remove an added condition on the **Edit automation** screen, swipe left and tap .

7. To add an action, tap **Then > Add an action** and select any of the following (1):

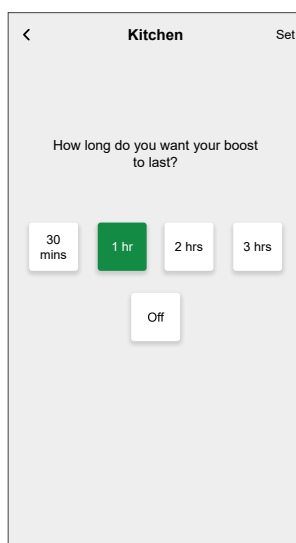

**NOTE:** Maximum 10 actions can be added.

- **Control a device:** Select a device that you want to trigger.
- **Send notification:** Turn on the notification for the automation.
- **Activate a moment:** Select the moment that you want to trigger.

8. Select **Heater** device to set an action and tap **Done**.

9. Tap **Heater > Boost**, select the hour and tap **Set**.

10. Tap **Save**.

The saved Automation is displayed on the **Automation** page. Tap the toggle switch to enable/disable the Automation.

## Editing an automation

To edit an automation:

1. On the **Home** page, tap  > **Automation**.
2. Tap the automation you want to edit.
3. On the **Edit automation** page, you can:
  - Change the icon.
  - Rename the automation.
  - Change the condition or action.
4. Remove the Condition or Action by swiping it to the left and tapping the .
5. Add a new condition or action and then tap **Save**.

## Deleting an automation

To delete an automation:

1. On the **Home** page, tap  > **Automation**.
2. Tap the automation that you want to delete.
3. On the **Edit automation** page, tap **Delete automation** and tap **Ok**.

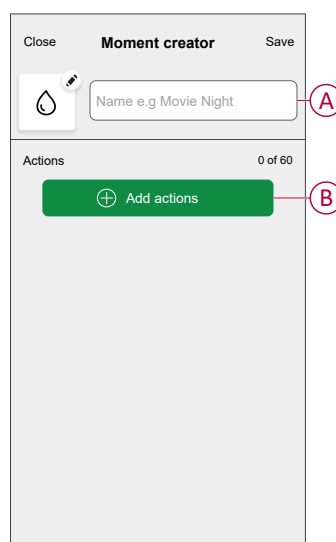

## Moments

Moment allows you to group multiple actions that are usually performed together. By using the Wiser Home app, you can create moments based on your needs.

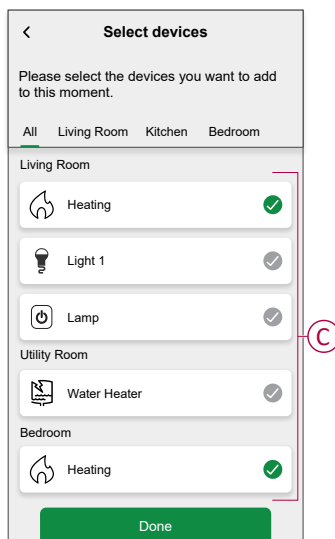

## Creating a moment

To create a moment:

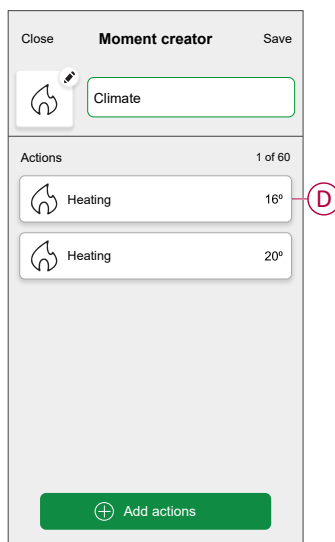

1. On the **Home** page, tap  > **Moments** > .
2. Enter the name of the moment (A).
3. Tap **Add actions** (B) to select the list of devices.

4. Select the devices (C) you want to set an action and tap **Done**.

5. On the **Moment creator** page, select any one of the following device (D) and set actions.
6. Drag the sliding bar (E) up/down to set the temperature and tap **Set**.

7. Once all conditions are set, tap **Save**.
- The saved moment is shown on the **Moments** tab.  
You can tap on the moment to enable it.

## Editing a moment

- On the Home page, tap  > **Moments**.
- Select the moment you want to edit .
- On the **Moment Editor** page, you can tap each item to change the settings and tap **Save**.

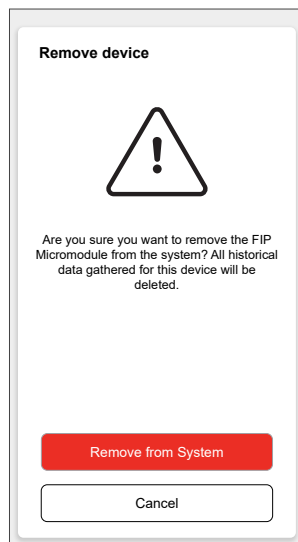

## Deleting a moment

1. On the Home page, tap  > **Moments** .
2. Select the moment you want to delete  .
3. On the **Moment Editor** page, tap **Delete** and tap **Ok**.

## Removing the device

Using the Wiser Home app, you can remove the device from the Wiser system.

1. On the Home page, tap  .
2. Tap **Devices** > **Climate** > **FIP Micromodule** > **Delete**.  
A confirmation window is prompted.
3. Tap **Remove from System**.

Removing the device will delete all the historical data.

## Resetting the device

You can reset the device to factory default manually.  
Short press the Setup/Reset button of the module 3 times and then long press once for 15 s on the module.

## LED indication

### Pairing the device

User Action	LED Indication	Status
Short press the push-button (PRESS) 3 times.	LED blinks amber once per second. 	Pairing mode is active for 30 seconds. When pairing is completed, LED displays green for a few seconds before turning Off. 

### Resetting the device

User Action	LED Indication	Status
Short press the push-button (PRESS) 3 times and hold it down once for > 10 s.	LED blinks red once per second. 	The device is in reset mode. The device then restarts and LED turns amber indicating that the device is ready for pairing. 

## Troubleshooting

Error	Possible cause	Solution
The device is not ready to pair after the device is removed from the app.	The device is not reset correctly.	Reset to factory default settings, refer to <a href="#">Resetting the device manually</a> , page 24.
 Data not available in the control panel page.	<ul style="list-style-type: none"> <li>The device is offline.</li> <li>System/Hub is unable to receive data from the device.</li> <li>Ethernet connection is incorrect</li> </ul>	Restart the device. Also, ensure to correct the Ethernet connection.
 <b>We are unable to implement your schedule and are working on fixing it as soon as possible.</b> displayed in the <b>Reduce My Bill</b> page.	Internet or technical issue.	Wait for sometime until the schedule is available.

## Technical data

Power supply	230 V AC, 50 Hz
Switching capabilities	230 V AC, 16 A
Power consumption	< 1 W
Max. Power	3680 W, Integrated Zero crossing
Operation Ambient temperature	-20 °C to 35 °C
Connecting terminals	Screw terminals: 1 x 1 - 2.5 mm <sup>2</sup>
Protection rating	IP20
Communication Protocol	Zigbee 3.0 (certified)
Radio frequency range	2.4 GHz
Dimensions (W x L x H)	40 x 44 x 16.9 mm
Max. radio-frequency power transmitted	< 10 mW

## Compliance

### Compliance information for Green Premium products
