

MV-227-43

Safety shoes with insulating sole, textile and high type

Series: MV-227-..

Application:

- Safety shoes, high and textile type, providing electrical hazard resistance up to 18 kV according to ASTM F2413:2018..
- Ventilated shoes for comfort in hot environments, indoors or on dry ground.
- Safety shoes with insulating sole specifically designed for the electricians, industry, building , oily and smooth soils.

Testées: EN 50321 - 5 kV /
ASTM F2412 - 14 kV / ASTM
F2413 - 18 kV

Rated Insulation Voltage

Operating Voltage AC
Operating Voltage DC

1 000 V
1500 V

Features:

- Each insulating sole tested at 5 KV.
- Shoes with textile and breathable liner microphone..
- Anti-penetration textile sole.
- Protection cap 240 J (20% above the standard).
- Slip resistance: SRC. Torsion resistant sole.

Protection Level:

- SB : Toe protection (200 joules).
- P : Penetration resistance.
- HRO : Behaviour to contact warmth (max. 300 °C).
- SRC : Non-slip on ceramic tiles/ cleaning agents and steel plates/ glycerine
