

MC-116

Shunt for conductor 30 to 200 A

Series: MC-116

Network Application: LV

Application :

- The shunt is a box used to ensure, before replacing a melted fuse on the conductor, that the failure is well removed.
- The shunt may also be used to open the circuit for accessories replacement on the network.

Tension

Operating Voltage AC	1 000 V
Operating Voltage DC	1 500 V

Features :

- Shunt to be used with 1 fuse when the nominal current on the conductor is lower than 100 A.
- Shunt to be used with 2 fuses when the nominal current on the conductor is between 100 A and 200 A.
