

## MO-831

Height measuring stick (LV and MV networks), extended length 11m, max voltage 50 kV

**Series:** MO-83.

**Network Application:** MV-LV

### Application:

- For measuring the height of LV and MV network conductors.
- Outdoor.

### Features:

- Material: insulating tube made of epoxy resin, glass fiber reinforced.
- Composed by 8 parts and locking by push button.
- Plan terminal tube (live-line working quality)
- Direct reading of the measurement on the lower tube, graduations in centimetres and metres.

### Description

Use	Indoor/Outdoor
Color	Array
Composition	Perche composée de 8 éléments en fibre de verre + 1 jonc terminal
Use	Indoor/Outdoor
Number Sections	8
<b>Fonctionnalité</b>	
Weight	3.3
Material	fibre de verre/résine polyester
Length Extended	11 000
Length Folded	1 500
