## MP-46500

Adjustable leveller device and pole leaning device

Series: MP-4650.

### Application :

- Accessories for insulating ladders.
- Ladder leveller device: fixed on the uprights, at the bottom of the ladder, it compensates for differences in height of support on the ground.
- Pole leaning device: fixed on the uprights, at the top of the ladder, it offers a "V" support for good stability on the posts.

Fonctionnalité  
Weight

4.9

### Features :

- Leveller device: Differences in level are compensated for by a mobile arch adjustable over a height of 20 cm.
- 2 models of stabilizer according to the sections of the ladder uprights.
- Pole leaning device: metal support equipped with anti-slip elastomer pads and straps for anchoring to the post.
