

## MP-402-MB

### Ladders with interlocking elements

Series: MP-40.-M. / MP-50.-D / MP-400/.

////////////////////////////////////

#### Application :

- Live working on overhead line supports.
- Maximum operating voltage 36 000 V AC.
- Nestable ladders are used for climbing on the posts supporting the lines.

#### Features :

- The **MP400** series for the basic and intermediate elements is made of metal.
- The **MP500** series for the end elements is fully insulated.
- All elements are equipped with pole leaning devices and support straps.
- The pole leaning devices are interchangeable on the insulating elements.

#### Description

Use	Indoor/Outdoor
Battery	
Composition	Elément de base
Use	Indoor/Outdoor
Number Rungs	7
<b>Fonctionnalité</b>	
Weight	6,5
Material	Aluminium
<b>Longueur</b>	
Length	2 100
<b>Tension</b>	
Operating Voltage AC	36 000 V
